**The NYC Tourette Syndrome Counseling Program** (NYCCP) is staffed by New York State Licensed Clinical Social Workers who have experience with the unique challenges encountered by people with Tourette Syndrome. Fees are based on a sliding scale and no one is denied service if unable to pay. This program provides counseling to individuals of all ages, couples and families. Support groups are also provided for children, teens, adults and parents .

The NYCCP has been helping to make better lives possible for the people of New York for over 25 years and has received a service excellence award from the NYC Department of Health. Educational presentations are also available upon request to schools, hospitals and other community organizations. The program is available Monday through Friday with daytime and evening hours.
